

# ECO-KING

**🇬🇧 Eco-King – The clever solution for composting**

- Rapido-click-system: Assembly without tools
- Easy filling through two big flaps
- Fast composting
- Wind-fix adjustment for the lid
- Easy and convenient withdrawal of compost
- Useable all year round
- Manufactured of 100% recycled plastic

**Please observe:**

- Put the composter on a flat surface
- Contact with the ground is important (microorganisms). We recommend to loosen the soil first
- HINT:** Place the composter on the Eco-King soil fence (accessory)
- Do not put the composter on asphalt or concrete surfaces
- Sunny or partly shadow position
- Wind-protected, but not windless position

**Best humus for your garden - free!**

**Save real money by composting:**

- saving household waste charge
- saves fertilizer, compost is nutritious - the best humus soil for your garden
- saves fees for organic waste collection bin

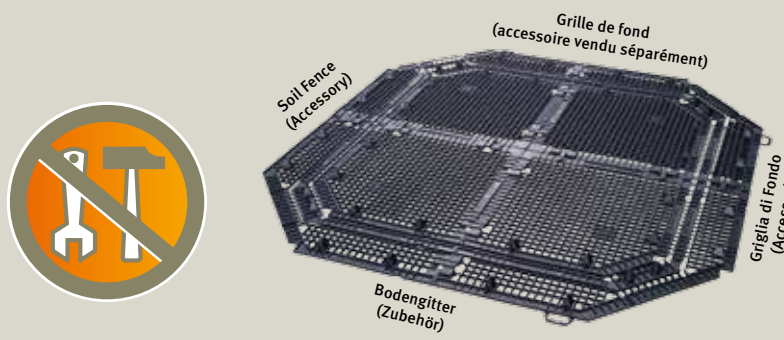

**Your active contribution to environmental protection!**

	<b>400/600 l</b> (106/159 US gal.)	<b>600 l</b> (159 US gal.)

- **400 l** (106 US gal.) L = 70 cm (27.6") B = 70 cm (27.6") H = 83 cm (32.7")
- **600 l** (159 US gal.) L = 80 cm (31.5") B = 80 cm (31.5") H = 95 cm (37.4")

**Contents:**  
 2 full side panels  
 2 panels with attached bottom access door  
 2 lid halves

1 Connect side panel to panel with bottom access panel (back) by inserting pegs into slots. Push until they click together.

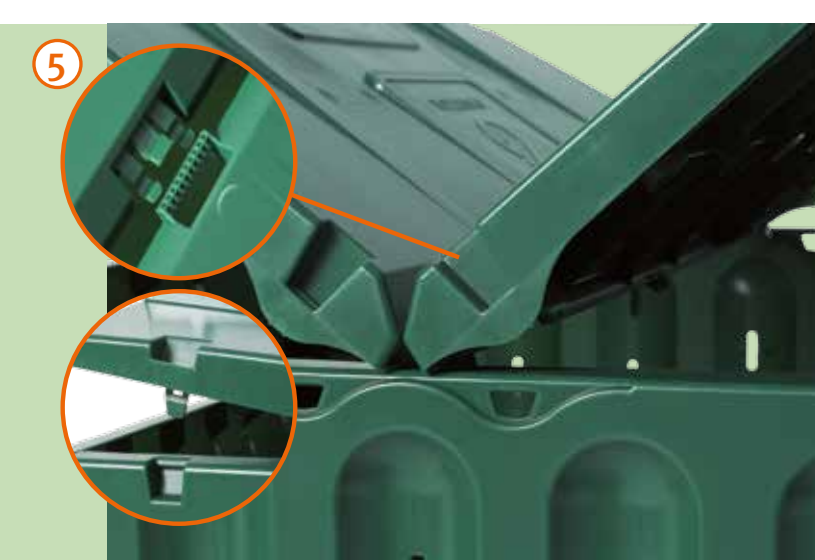

2 Connect other side panel to the opposite side of the back panel with bottom access door. Click together.

3 Remove bottom access door of remaining front panel by cutting carefully through the plastic tabs.

4 Connect the top portion of the front panel by clicking into place of the side walls. The bottom access door attaches by hooking on the notches under the front panel (see inset circles), then clicks shut.

5 Click the interlocking hinges together of the two halves of the lid and set in place. Each lid will be held in place with clips on the side (lower inset circle).

Begin composting!
