

Bottle Light

Converts an ordinary glass bottle into a stylish home accent.

The Bottle Light is made to fit a wide variety of bottles with neck openings from 5/8" to 1" dia. Depending on the Bottle Light style you select, just set the holder into a bottle, add a stick candle, votive or tea light, or lamp oil. No assembly whatsoever! The 6 3/4" length provides perfect balance to prevent toppling and the wide 3" dia. rim catches dripping wax. Except for the metal lining inside the candleholder cup, the core is a strong, heat resistant polycarbonate, which is given an electroplated finish. Two finishes are available: the stainless look-alike and a mellow antique patina.

Choose from 3 styles.

Left: Use with standard tall candles.

Center: Use with votives & tea lights.

Right: Use either as an oil lamp or with tall candles.
