

HELIOS polycarbonate 10mm

This page is for polycarbonate units only.

Please note the crescent seal (E400330) is NOT used with polycarbonate. It may be shipped with your unit, but it is only used on GLASS panels.

As shown below the blue transport tape is removed and replaced with a U-profile.
 The grey tape remains at the top to prevent contamination from dirt.
 The U-profiles are not used in the doors and windows.
